Career Objective

UI/UX Designer with a Master's in Visual Communication and a background in Computer Science. This mix of art and logic helps me build apps and websites that look great and actually work. By putting people first, I turn complicated ideas into simple, clean screens for any device. Since I also know how to code, I work seamlessly with developers to make sure every small detail is perfect in the final product.

Education

Master's in Visual Communication
University for the Creative Arts , UK
2024-2025

B.Sc in Computer Science and Engineering
Metropolitan University
2019-2023

Relevant Projects

[Easy Tutor Dashboard](#) | UI/UX Case Study | Personal Project - "March 26"

- **Designed** a responsive dashboard with a color-coded layout to simplify student and financial tracking.
- **Conducted** research to automate fee calculations and receipt generation, solving key bookkeeping pain points.
- **Built** accessible prototypes and a design system for seamless developer handoff.
- **Impact:** Reduced admin work by 60% through automated tracking and one-click receipts.

[Gear Discovery: Technical Gear Redesign](#) | UI/UX Case Study | Personal Project - "April 26"

Designed a high-contrast e-commerce platform optimized for mobile legibility in bright sunlight.

- **Conducted** research to build scannable data tables that simplify complex technical gear comparisons.
- **Built** a scalable design system and high-fidelity prototypes for a smooth user experience.
- **Impact:** Achieved AAA accessibility standards, ensuring 100% readability for outdoor use.
